## EDUCATION

### AKTU UNIVERSITY

#### B.TECH IN COMPUTER SCIENCE ENGINEERING

2020 - 2024

Lucknow, India

Grade: 75%

### RANI LAXMI BAI MEMORIAL SS SCHOOL

#### HIGHER SECONDARY EDUCATION

2016 - 2018

Lucknow, India

12th: 78%, 10th: 95%

## SKILLS

### LANGUAGES

Python •  
SQL •  
Java •  
JavaScript •  
C++

### BACKEND AND APIS

FastAPI •  
Django •  
Flask •  
Node.js •  
Express.js •  
RESTful API Design •  
Microservices

### DATABASES

PostgreSQL •  
MongoDB •  
Firebase •  
Query Optimization •  
RDBMS

### CLOUD AND DEVOPS

Docker •  
Kubernetes •  
AWS •  
GitHub Actions •  
Jenkins •  
CI/CD

### FRONTEND

React.js •  
Bootstrap

### TOOLS AND PRACTICES

Git •  
GitHub •  
JWT •  
OAuth 2.0 •  
Agile •  
DSA

## EXPERIENCE

### NAVADR TECHNOLOGIES | DATA ENGINEER

Oct 2024 - Present | Pune, India

- Engineered production ETL pipelines in Python and SQL processing 500K+ daily records, improving throughput by 35% through batch optimization and parallel execution.
- Designed normalized data models in PostgreSQL and MongoDB, reducing average query latency by 25% via index optimization and materialized views.
- Built and deployed an automated data quality validation framework adopted by 12+ engineers, reducing pipeline failures by 40% through schema enforcement and anomaly detection.
- Developed RESTful API endpoints with FastAPI and JWT authentication serving 100K+ daily requests across microservices.
- Containerized data services with Docker and orchestrated deployments on Kubernetes, integrating CI/CD pipelines in GitHub Actions and Jenkins.

## DESIGN EXPERIENCE

### LEARNING MANAGEMENT SYSTEM (LMS)

Full-Stack Platform

- Architected a full-stack Learning Management System with authentication and progress tracking, improving course management for an intuitive user experience.
- Implemented RESTful API design patterns with Express.js and MongoDB, supporting role-based access via JWT and OAuth 2.0.
- Deployed the platform using Docker containers and configured CI/CD via GitHub Actions for automated test and release cycles.

### QR CODE-BASED ATTENDANCE SYSTEM

Contactless Attendance System

- Designed and deployed a QR code-based attendance system using Python and Flask, enabling real-time attendance tracking across 3 departments.
- Built computer-vision based QR detection with OpenCV and NumPy, reducing average mark-in time by 70% versus manual roll-call.

## HONORS/AWARDS

|      |                                                                      |
|------|----------------------------------------------------------------------|
| 2022 | Gold Medalist, AKTU Zonal Kho-Kho Championship                       |
| Cert | Google Analytics Individual Qualification - Google Analytics Academy |
| Cert | Ethical Hacking - iNeuron (Cybersecurity and Penetration Testing)    |
