Summary

Highly skilled and results-driven **Backend Software Engineer and Data Professional** with practical experience in designing and deploying scalable **web services** and robust ETL pipelines. Proficient in **Python**, **SQL**, and **Git**, with expertise in frameworks like **FastAPI** and **Django**, and hands-on experience with **cloud container architecture** including **Docker** and **Kubernetes**. Proven ability to enhance data processing efficiency by 35% and reduce query latency by 25%.

Education

AKTU University

B.Tech in Computer Science Engineering

Rani Laxmi Bai Memorial SS School

Higher Secondary Education

2020 – 2024

Lucknow, India

2016 – 2018

Lucknow, India

Experience

Navadr Technologies

Oct 2024 – Present

Data Engineer

Pune, India

- Engineered robust production ETL pipelines utilizing **Python** and **SQL**, processing over 500K daily records and improving throughput by 35% through optimized batch execution.
- Designed normalized data models in PostgreSQL and MongoDB, reducing average query latency by 25% via strategic index optimization and materialized views.
- Built and deployed an automated data quality validation framework, reducing pipeline failures by 40% through schema enforcement and anomaly detection, adopted by 12+ engineers.

Notable Projects

Learning Management System (LMS) | *React.js, Node.js, Express.js, MongoDB, Bootstrap*

- Architected a comprehensive full-stack **web service** for an LMS, implementing robust authentication and progress tracking functionalities to enhance course management and user experience.

QR Code-Based Attendance System | *Python, OpenCV, NumPy, SQL*

- Designed and deployed a real-time QR code-based attendance **web service** using **Python** and Flask, enabling efficient tracking across 3 departments and leveraging **SQL** for data persistence.

Technical Skills

Languages: Python, SQL, JavaScript, Java, C++

Backend Frameworks & APIs: FastAPI, Django, Node.js, Express.js, RESTful API Design, Web Services

Databases: PostgreSQL, MongoDB, Firebase

Cloud & DevOps: Docker, Kubernetes, AWS, GitHub Actions, Jenkins, CI/CD, Cloud Container Architecture

Version Control: Git, GitHub

Frontend: React.js, Bootstrap

Tools & Methodologies: Agile, Microservices, Data Structures & Algorithms (DSA), JWT, OAuth 2.0
