EDUCATION

AKTU University	Lucknow, India
B.Tech in Computer Science Engineering	2020 – 2024
Rani Laxmi Bai Memorial SS School	Lucknow, India
Higher Secondary Education	2016 – 2018

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, C++, Kotlin
Frameworks & Tools: FastAPI, Django, Node.js, Express.js, Spring Boot, Spring MVC, RESTful API Design, PostgreSQL, MongoDB, Firebase, MySQL, Relational Databases, Docker, Kubernetes, AWS, GitHub Actions, Jenkins, CI/CD, Maven, Gradle, Apache Kafka, RabbitMQ, React.js, Bootstrap, Git, GitHub, JWT, OAuth 2.0, Agile, Microservices Architecture, Object-Oriented Programming (OOP), Design Patterns, Data Structures & Algorithms (DSA)

WORK EXPERIENCE

Data Engineer	
Navadr Technologies	Oct 2024 – Present
– Engineered scalable backend ETL pipelines and RESTful APIs in Python and SQL, processing over 500,000 daily records and improving data throughput by 35% through batch optimization and parallel execution.	
– Designed and optimized relational databases using PostgreSQL for normalized data models, reducing average query latency by 25% via index optimization and materialized views, demonstrating strong database management skills.	
– Developed and deployed an automated data quality validation framework utilizing Object-Oriented Programming (OOP) principles, reducing pipeline failures by 40% through schema enforcement and anomaly detection, and enhancing system reliability across 12+ engineering teams.	

PROJECTS

- Learning Management System (LMS), Architected and developed a full-stack Learning Management System (LMS) as a scalable backend system, incorporating RESTful APIs for authentication and progress tracking, resulting in an intuitive user experience and improved course management.
- QR Code-Based Attendance System, Designed and deployed a QR code-based attendance system using Python, leveraging SQL for robust data management, enabling real-time attendance tracking across 3 departments with efficient backend processing.
